Abstract of JP11255660

PROBLEM TO BE SOLVED: To obtain the subject extract which can specify the quality of various crude drugs by using a physical indicator related to the effect of medicine and contribute to the offer of the crude extract of stable quality and the appropriate standardization of medicines by using a soluble silicon compound. **SOLUTION:** This extract contains a soluble silicon compound in an amount of 0.05 mg or more in terms of silicon per 1 g of the dry product as an active ingredient. Further, in order to produce a crude drug extract, a crude drug, e.g. *Salviae miltiorrhizae radix*, *gardenia lucidum* or the like, is used as a raw material. The above raw material is heated in purified water under refluxing and stirring, the unnecessary substance is removed by filtration or the like to obtain an extract, then when necessary, the extract is concentrated and the residue is treated by spray-drying or freeze-drying under reduced pressure.
